

MIXTEC

FOR MIXING TECHNOLOGY

Versatile IBC Mixers

IBC Mixers for a Multitude of Applications

IBC mixers are used across a number of industries for a range of applications. We have supplied them for reconstituting product delivered in IBC's, for manufacturing cleaning products, for mixing agricultural solutions on farms, orchards and vineyards, for polymer make up to use in water treatment, for mixing additives and clarifiers in wineries, to name just a few !

Standard Electric Motors

Available with standard electric motors for non hazardous applications, standard models available from 0.75 kW to 2.2 kW, speed control via optional VSD.

Air Motors

Air motor drives for hazardous applications, standard models available from 1.0 kW to 3.0 kW, air motors have the advantage of speed adjustment via air flow regulation but can be noisy.

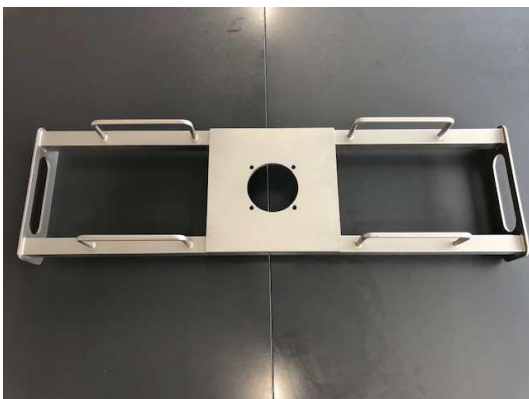

Low to Medium Viscosity

Collapsible impellers of different diameters available for viscosities up to 2,000 cPs.

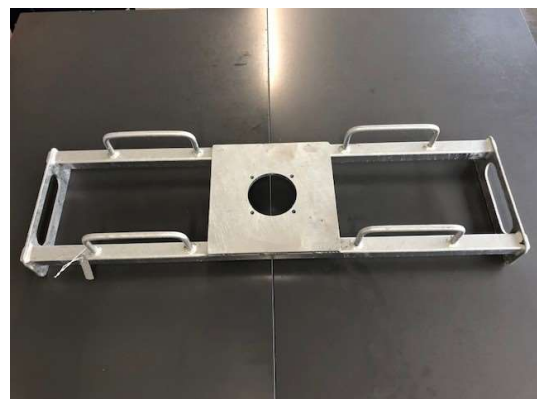

High Viscosity Impellers

Sweep impellers for use with very high viscosity products and mixing to low levels.

Stainless Steel IBC Frame

Galvanised CS IBC Frame

Special and customised units are available, please contact us with your requirements by replying to this email or visit our website;
