

## TOP ENTRY MIXERS

Mixtec – Western Engineering manufacture Top Entry Mixers for a variety of industries and applications in a range of sizes from 0.18kW to 150kW and beyond. Each mixer is custom designed and manufactured for your application.

Mixtec – Western Engineering are a 100% NZ owned and operated company that prides itself on quality and on-time delivery. We manufacture mixers in our Auckland factory under licence using technology supplied by Mixtec in South Africa, who are one of the world's leading manufacturers of mixers and agitators.

Mixtec review your mixing process requirements based on tank dimensions, product viscosity, specific gravity and a process description to provide you with a mixing concept and quote for your mixer. All mixers are custom designed by our highly trained mixer design specialists who focus on the mechanical integrity of the mixing components and drive system resulting in reliable and robust solutions. Mixtec has extensive experience in the dairy, pharmaceutical, food, beverage, wine, chemical and water care industries.

Mixtec top entry mixers are available with several shaft sealing options including mechanical seals, packed glands and rotating caps (oil flingers). Drive options include single and three phase electric motors, flameproof Exd / DIP motors, air and hydraulic.

We offer anchor mixers for high viscosity products. For steam jacketed kettles we offer scraped surface agitators with Teflon blades and a counter-rotating option for viscous products.
